

I'm appalled by Sinclair Broadcasting's decision to air an anti-Kerry documentary just before the election. This is just the current administration's last attempt at hijacking the elections once again.

Sinclair is supposed to serve the public interest, but all they are doing is controlling the airwaves. America has seen the debates between the two candidates. Let Americans make their decision based on the fair debates as they watched the candidates respond to the questions. Airing this documentary, just days before the election, is tampering with the hearts and minds of the voters, and is undemocratic and manipulative.
